KEY GMI FACTORS

The most critical factors underlying GMI scores for this sector include spending on:

- Green research and development
- Pollution prevention practices and resource conservation
- Employees dedicated to managing environmental performance

Other factors that dominate companies' actual environmental spending in this sector include:

- Procurement and maintenance of pollution control equipment
- Waste treatment and disposal

Top 5 Companies	Revenues	Score

Latest news: ABC Chemicals announces supply-chain audit initiative

COMMENTARY
ABC Chemicals continues to demonstrate solid performance. Its continued attention to risk management, exemplified by robust spending on supplier assessments and employee training, continue to pay off. Spending on R&D and marketing is somewhat weaker and demonstrates some room for improvement.
